About the Product

Tagbina is a place blessed with fertile soil and a climate conducive to coffee cultivation. For generations, the local farmers have grown coffee, relying on traditional methods passed down through their ancestors. Coffee has always been more than just a crop; it's a way of life, a symbol of hard work, and a source of pride for the community.

The idea of turning coffee into a jam was born out of necessity and creativity. In times of surplus, when coffee beans were abundant, local farmers sought ways to preserve their harvest and create value-added products. This led to experiments with coffee, combining it with sugar and other ingredients to create a unique and flavorful jam.
